

ASPIRE

LOW DIMENSIONAL NANOMATERIALS
FOR ENERGY STORAGE AND SENSING APPLICATIONS

INOVATION THROUGH SYNERGY OF ACTION

WHAT WE DO

- ✓ atomic control of materials' design
- ✓ research and innovations through development of new materials
- ✓ combination of modern approaches to device development, data acquisition and processing
- ✓ contributing to the economy and society by strengthening capacity to provide relevant, on-time information on atmospheric conditions that are of strategic importance for agriculture, food production, environmental protection and health of people in Serbia
